

I am not a pet!

Wild animals belong to the wild! NOT in our homes!

- Even if they look cute, they can **transmit diseases**.
- Each animal plays an important role to **stabilize the ecosystem**.
- The wilderness is their home - this is where **their family** is.
- Animals can **become violent** when in captivity.
- Once in captivity, it is **not easy to set them free**, when they are not used to the wild.
